

Region: Brussels (BE)
Sector: Railway, Transport
Experience: 5 to 10 years

Who are we?

EGLF Engineering is a company specialized in the design of electronic equipment used in the transport sector: train, tramway, automotive, public transport, signaling, ...

We are partner of some major industrial actors, as well as fleet operators or infrastructure operators. Our activities are today mainly located in Belgium, but we are regularly involved in mission across the rest of Europe.

We are a young and flexible company and as such, we are offering an optimal context for engineers to increase their experience.

We are today looking to recruit a

Quality Manager

Profile

- Engineer with experience (5 - 10 years) in the rail or guided transport (metro, tramway) sector;
- Technical knowledge;
 - Experienced with application of EN 50126/50128/50129 and CSM (Common Safety Method)
 - Expertise in ISO 9001 process
 - Understand Ubuntu / RedHat Linux system environment
 - Understand software code (Java and C) to be able to validate it against the coding guidelines and the architecture and design.
 - Understand software architecture
 - Being critical with safety applications
- You are very meticulous and precise.
- You can work in team but also independently and autonomously.
- You can communicate effectively.
- You are accurate in reviewing the input information and execution of the tasks.
- You have an Agile mindset
- Be fluent in ENG and have a good knowledge of FR or NL (Oral and writing)

Function:

The Quality Manager will be responsible for implementing and ensuring adherence to the quality processes, while aligning them with safety protocols.

- Fine-tune the quality process for software development and asset management.
- Implement this quality process across various projects and teams.
- Oversee multiple projects in parallel, ensuring quality and process alignment.
- Align quality and configuration management processes with safety standards (CSM – EN50128 – EN50129).
- Conduct internal process audits to assess adherence to quality standards, report deviations, and follow up on action plans.
- Participate in Verification & Validation activities.
- Develop and monitor the quality plan, ensuring compliance with ISO 9001 standards.
- Define quality targets based on project critical factors and select appropriate methods/tools.
- Report quality status, incidents, and root-cause analyses to project management, team management, business management, and other relevant parties.
- Communicate quality objectives to all affected or involved stakeholders and escalate any project-endangering situations as required by the role.

Offer:

By joining EGLF Engineering, you will be part of a young company that will allow you to develop your competences in a sector which is in constant evolution. You will participate in the technological challenge required by the transport of tomorrow. We offer :

- Permanent contract
- Competitive salary including mobile phone, meal vouchers, pension scheme & hospitalisation, ecocheques
- Positive & stable working atmosphere
- Company car or public transportation

Apply by sending us your resume at jobs@eglf-engineering.be.
